

EDGEENDO®

PRODUCT CATALOG

2025

Created by an Endodontist for Endodontists

Established in 2012 by American Endodontist Charles Goodis, EdgeEndo® was founded with the vision to make root canal treatments safe, easy, and cost-effective overcoming the shortfalls of manufacturers offering outdated technology with a high price tag.

The solution – Innovation combined with high-quality and cost-effectiveness to support the growth of endodontic practices by saving chair time and delivering outstanding patient outcomes. In just ten years, EdgeEndo® revolutionized the endodontic industry in the USA becoming a leader in endodontic solutions!

Safe – Healthy Patients - Happy Dentists. EdgeEndo® solutions are developed with the patient at the center. Our FireWire heat treatment processes provides excellent resistance to cyclic fatigue and flexibility to carefully follow the canal, preserving canal anatomy and dentin and allowing for faster procedures. All for increased safety and productivity.

Easy – Changing habits is always a challenge for any dental professional. Our solutions are designed for ease of use and are compatible with most endodontic techniques. EdgeEndo® continues expanding its product offering to cover the entire endodontic procedure; diagnosis, instrumentation, obturation and restoration. No need for multiple sources and complexity. We make it easy for the dentists.

Cost-Effective – EdgeEndo® has proven that quality does not need to come with a premium price tag. Our goal is to make root canals accessible to anyone, without compromises.

EdgeEndo® remains steadfast in its mission to provide game-changing products and solutions

Innovation - EdgeEndo® is the inventor of FireWire and FireWire Blaze, a unique combination of heat treatment and cryogenic applications allowing NiTi instruments to deliver incredible flexibility and resistance to cyclic fatigue.

Quality – Thousands of clinicians trust EdgeEndo® and our mission to deliver a seamless and consistent experience with all our products. The control of manufacturing processes is our obsession, and our instruments are all manufactured in the USA, Switzerland, and France under strict quality controls.

**Revolutionize endodontic procedures with EdgeEndo®:
the partner dental professionals have been searching for!**

EDGEAPEX HP™

- Built in Apex Locator with option to use as a standalone Apex locator with handfile
- Pre-programmed with top selling EdgeEndo files PLUS 10 fully customizable Memory Program slots
- Efficient brushless motor, low noise, long service life
- Cordless portable endo motor with combined length determination
- 360° rotation of contra angle
- Adopt real-time feedback technology and dynamic torque control, effectively preventing file separation
- Wireless Charging
- Torque Control
- Auto On/Off, Torque Reverse, Apical Reverse, Apical Slow Down
- Visual torque on file in use
- Max Torque 5.0 Ncm
- Change Dominant Hand
- Range: 100 - 2500 RPM

EDGEFLOW™

- Wireless and electric
- Excellent gutta-percha fluidity, uniform and smooth gutta-percha output without bubbles.
- Precise and intuitive display of remaining gutta-percha
- Auto heating stop after timeout; Auto shutdown after timeout
- Charging base with battery
- Temperature monitoring design
- Dual batteries deliver longer endurance, enabling filling about 100 root canals.
- Re-usable Injection needles available in various sizes and lengths
- Preset temperatures: 100°C, 120°C, 150°C, 180°C, 200°C
- Injection Speeds: Slow, Medium, Fast

EdgeTips™ 1-5 are diamond-coated for more efficiency. We don't use zirconium nitride. EdgeTips™ 6-8 are a special titanium alloy and their special geometries allow precision work in areas of limited access.

- Find calcified or hidden canals.
- Remove intracanal obstructions.
- Remove dental restorations and cores.
- Dislodge posts and broken instruments.
- Remove remove pulp stones.
- Unique shaft designs for better access and visibility.
- Length and diameters designed to progress down the root.

EdgeTip #1 - Diamond-coated ball tip, length 20mm, taper 5%.

ETBD

EdgeTip #2 - Diamond-coated steel tip 76µm, length 18mm, taper 5%

EDGE U UTOPIA™ BC SOLVENT

**EdgeUtopia™ BC Solvent is not just another solution,
it's *THE* solution for dissolving Bioceramic Sealers**

Dissolves Bioceramic Sealers and Calcium Hydroxide.

EdgeUtopia™ BC Solvent is engineered to dissolve the toughest bioceramic sealers and calcium hydroxide, outperforming other traditional solutions on the market. No more struggle with difficult to remove materials.

Tough on Sealer. Gentle on Teeth.

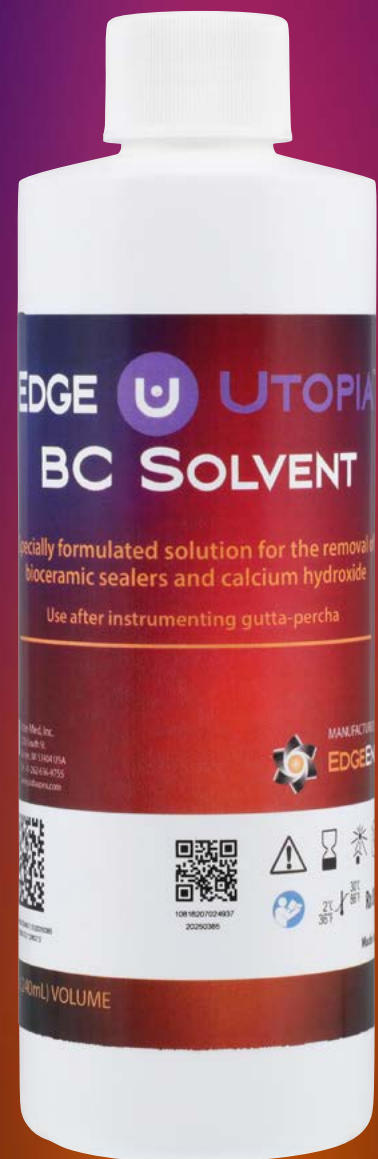

While other products fall short on dissolving tough materials without damaging sensitive structures, EdgeUtopia BC Solvent works precisely where it's needed most, while maintaining the integrity of the surrounding tooth tissues.

EdgeUtopia™ BC Solvent - Preserving What Matters.

The EdgeGlidePath™ heat treated FireWire NiTi file features the flexibility and strength that EdgeEndo® is known for, replacing as many as 8 instruments to create a glidepath faster, with far less effort and with a 1mm maximum flute diameter. Replaces #15, 20, 25, 30, 35 hand files in a step-back technique and a #1, 2 & 3 Gates Glidden. Used exactly like Tulsa Dental ProGlider® at substantially lower cost.

*ProGlider® is a registered trademark of Dentsply Tulsa Dental Specialties.

EDGE SURGICAL TIP™

\$52.25 each

EdgeSurgical Tips™ are designed for use in endodontic microsurgery. Made with a diamond coating, these instruments cut dentin faster without need for repeated ultrasonics. The dentin surface is left smooth yet microscopically rough which results in better adaptation of filling materials.

- Diamond coating for efficient cutting of dentin.
- Irrigation strategically placed at the tip for control.
- Tip angles and lengths designed for access to difficult areas.
- We don't use zirconium nitride.

EdgeSurgical Tip #1

Diamond-coated universal tip 30µm, length 3mm, taper 9%

AS3D1

EdgeSurgical Tip #2

Diamond-coated universal tip 30µm, taper 9%

AS3D2

EdgeSurgical Tip #3

Left-oriented retro surgery tip, diamond-coated 30µm, length 5mm, taper 7%

P15LD

EdgeSurgical Tip #4

Left-oriented tip, diamond-coated 30µm, length 3mm, taper 10%

ASLD

EdgeSurgical Tip #5

Right-oriented tip, diamond-coated 30µm, length 6mm, taper 7%

P15RD

EdgeSurgical Tip #6

Right-oriented tip, diamond-coated 30µm, length 3mm, taper 10%

6 Pack

Unmatched Strength and Flexibility

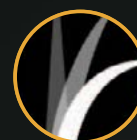

- Universal File System
- #1 Fan Favorite
- FireWire NiTi Heat Treatment provides super elasticity with no shape memory
- Constant Tapered Rotary Files
- Non-Sterile
- Tighter pitch and flutes which deflect more torsional forces along the length of the file
- Non-cutting tip with flutes extending to 0.25mm—offering precision and safety in one design

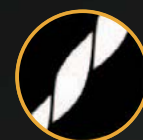

- Parabolic Shapped Cross-Section
- Available in 3 lengths: 21, 25 & 29 mm
- Constant Taper: .04 and .06
- Rotary files
- Speed: 450 RPM
- Torque: 2.9 NCm

Capable of
90° Curves

No Bounce

Engineered for Strength with Flexible Precision

- Designed with a Safe-Core[™] Parabolic Cross- Section
- .04 or .06 constant taper file until flute diameter reaches 1.0 then taper is 0.
- Safe unwinding feature
- Super elasticity. No Shape Memory.
- FireWire NiTi Heat Treated
- Variable Tapered Rotary Files
- Features its own dedicated Glidepath system
- Non-Sterile
- Alternative to ProTaper[®] Next¹ systems

- Parabolic shaped cross-section
- Available in 3 lengths: 21, 25 & 29 mm
- Speed 300-500 RPM
- Torque 2.94 Ncm

Elegance in Innovation, Strength in Versatility

- Minimally Invasive Progressive/Regressive Variable Tapered File System.
- Ability to perform in **both rotary or forward reciprocation** settings.
- Rotary Motion: Delivers maximum cutting efficiency and debris removal.
- Forward Reciprocation Motion: Maximizes safety while still allowing for efficient cutting.
- Unique geometry, innovative cutting angles and optimized FireWire™ Blaze Heat-Treatment** allows files to navigate curvatures with ease while maintaining dentin preservation in the coronal third.
- Alternative to ProTaper Ultimate™* & Minimally Invasive Alternative to ProTaper™*.

- Diamond Cross-Section
- Available in 21mm and 25mm lengths
- Progressive/Regressive Variable Taper File
- Pre-Sterilized

Constant Taper. Consistent Reciprocation.

- Tighter pitch and flutes which deflect more torsional forces along the length of file due to the parabolic cross-section
- All X1 files (20.06 small, 25.06 primary, 40.06 large) have a constant 6% taper until the flute diameter is 1.0 mm then it goes to 0 taper
- FireWire NiTi Heat Treated
- Short handle 11mm
- Non-Sterile
- Alternative to WaveOne®¹

- Parabolic Shaped Cross-Section
- Non - Cutting Tip
- Available in 3 lengths: 21, 25 & 31 mm
- Constant Tapered Reciprocating file system should use the same motor settings as WaveOne®¹

EDGE BIO CERAMIC™ SEALERS

EDGE BIO CERAMIC™ SEALER

2g syringe + 15 disposable tips

Cold Obturation

EdgeBioCeramic Sealer™ trusted in over **50 million cases worldwide** since 2008, EdgeBioCeramic Sealer™ offers proven, reliable performance. Easy-to-use, premixed, and resin-free, it's hydrophilic with zero shrinkage. The reduced waste tip preserves material by 62%, maximizing efficiency and cost savings.

Features:

- Radiopacity: High
- Backed by over 17 years of clinical use and extensive studies
- Ideal viscosity for single cone hydraulic condensation
- Composition: Tricalcium Silicate, Dicalcium Silicate, Zirconium Oxide, Tantalum Oxide

\$136.05 Each

Sealer Sku: 818365020072

Disposable Tips Sku:

EEBCT15

\$18.73/ 15 Tips

EDGE UTOPIA™ BioCeramic Sealer

2g syringe + 20 disposable tips

Warm & Cold Obturation

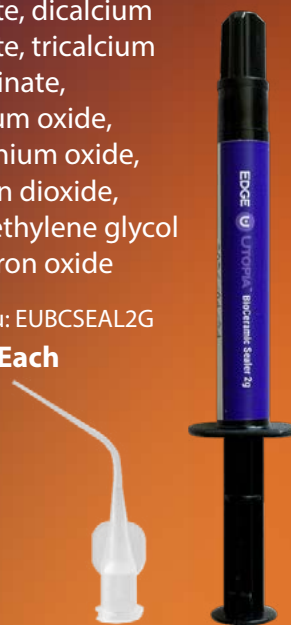

EdgeUtopia™ Sealer with its superior flow and small average particle size makes it **optimal for both warm or cold obturation techniques**. Its high pH of 12.5 offers powerful antibacterial properties, keeping the canal infection-free. Designed for moist environments, its hydrophilic nature ensures a secure seal in wet conditions.

Features:

- Radiopacity: Higher
- Our most cost effective Bioceramic sealer
- Ideal for both cold and warm obturation techniques
- Composition: Tricalcium silicate, dicalcium silicate, tricalcium aluminate, calcium oxide, zirconium oxide, silicon dioxide, polyethylene glycol and iron oxide

Sealer Sku: EUBCSEAL2G

\$76.34 Each

EDGE BIO CERAMIC™ THERMALFLOW™

1.5g syringe + 15 disposable tips

Warm Obturation

EdgeBioCeramic™ ThermalFlow™ is an **optimized version** of EdgeBioCeramic Sealer™ with the same resin-free, hydrophilic, and zero shrinkage benefits, but with **lower viscosity for enhanced warm obturation techniques**. The reduced waste tip preserves material by 62%, maximizing efficiency and cost savings.

Features:

- Radiopacity: Highest
- Ideal for Warm Obturation with enhanced flowability
- Lowest viscosity and highest radiopacity
- Composition: Tricalcium Silicate, Dicalcium Silicate, Zirconium Oxide, Tantalum Oxide

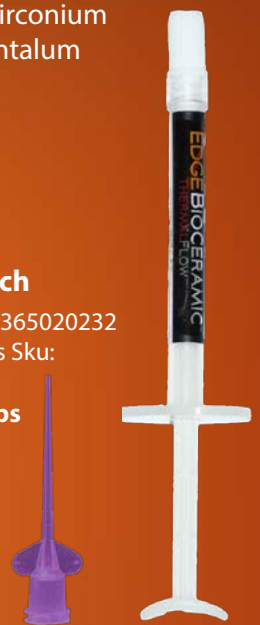

\$136.05 Each

Sealer Sku: 818365020232

Disposable Tips Sku:

NEW EdgeEndo® Gutta Percha: Optimized Performance, Seamless Results Optimized For Use with Our Most Popular NiTi File Systems!

Seamless Integration

Tailored to work effortlessly with EdgeEndo file systems for streamlined endodontic procedures.

Proprietary Stiffening Process

Provides improved handling, less tip crumpling, and improved displacement of sealer.

Optimized Apical Fit with Coronal Venting

Designed for a tight apical fit with extra space in the coronal third to facilitate the upward venting of sealer thus minimizing the risk of apical extrusion. Additionally, this design helps prevent gutta percha from “hanging up” in longer canals promoting more efficient obturation.

Gutta Percha Quick Reference

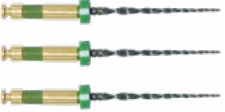

These are the suggested gutta percha points for EdgeOne Fire, all EdgeTaper Families and EdgeOne Blaze Utopia NiTi Systems.

EdgeCaOH™ - \$20.90		
2.2G SYRINGE	00818365020003	

Temporary root-canal filler for weeping canals that forms a hard-tissue barrier (apexification). Internal and external root resorption. Pre-mixed paste. Syringe tip for easy delivery of paste into canal. 10 Disposable tips included to prevent cross-contamination.

EDGE TEMP™ PLUS

\$11.47 Each

40G	WHITE PASTE	ETEMPPLUS
-----	-------------	-----------

Hydraulic temporary restorative material. Designed for fabricating temporary fillings and other temporary prosthetics until the permanent restoration can be delivered. Setting time: 30 minutes.

EDGE BIO CERAMIC RETROFILL™ AND PERFORATION REPAIR MATERIAL

\$198.90 Each

0.5G	WHITE PASTE	818365020089
------	-------------	--------------

EdgeBioCeramic™ RetroFill is a unique bioceramic repair material that exhibits superior healing and handling properties that has been shown in studies to out perform MTA. In addition, EdgeBioCeramic RetroFill is premixed and ready to use unlike MTA. Simply syringe out a small amount of material and deliver it to the repair site.

The Future of Root Repair

Root Repair Material

EdgeUtopia™ RRM is the optimal solution for root repair, offering excellent clinical outcomes with its scientifically backed performance, versatility, and long-term efficacy. EdgeUtopia RRM is the ideal choice for all your root and pediatric repair needs.

This proven pre-mixed calcium silicate repair material has now been upgraded to feature a novel monodose delivery system to improve handling and reduce the risk of cross-contamination. Trust in EdgeUtopia™ RRM for tissue healing, bacteria prevention, and overall root canal repair success.

EDGE UTOPIA RRM™

Root Repair Material

Indications

Pre-Mixed Ready-to-Use Monodose Capsule

Forget the hassle of your repair material drying out too soon. Experience effortless, reliable performance with every use. No manual mixing and no titration devices needed.

Reduced Cross-Contamination

Unlike other premixed, manually mixed or titrated bioceramics, EdgeUtopia RRM™ ensures hygienic, mess-free delivery with no risk of contamination between patients due to its single dose application and the elimination of extensive manipulation in the operatory.

Release of Ca²⁺

Proven track record with over 5 years of clinical cases and research studies* demonstrating exceptional tissue healing and regeneration outcomes.

Wide Range of Applications

- Apexification
- Retrofilling
- Perforation Repairs
- Pulpotomy
- Pulp Capping
- External and Internal Resorption
- Deciduous Tooth Repairs

Cost-Effective Innovation

More product for a fraction of the price – helping you save money while delivering high-quality results. 3x the amount of our regular syringe formula per box.
