Excellent Strength and Flexibility

EdgeEndo[®]'s Leading Proprietary Global Platform:
Most recognized and proven solution!

Heat Treated FireWire[™] NiTi

FireWire[™] NiTi alloy is an innovation in file metallurgy. It makes our files more flexible and significantly increases resistance to cyclic fatigue. FireWire[™] NiTi enables EdgeEndo[®] files to not "bounce back", preserving canal anatomy, and carefully follows the canal as they shape.*

*Based on resistance cyclic testing as shown on the FireWire NiTi Strength Graph:<http://edgeendo.com/comparative-study-of-cyclic-fatigue-resistance/> and price comparisons vs retail price. For more information, please visit www.edgeendo.com/matter-of-temperature/
